Summary

I'm **Aissam Abouqassime-Eledrissi**, a Computer Science student at **1337** Coding School with a strong interest in mobile application development.

I enjoy building practical apps, exploring new technologies, and improving my coding skills through **hands-on projects**.

Education

1337 coding school (42 Network)

level 11.54

November 28, 2023 - November 11, 2026

Software engineering

<https://1337.ma/en/>

A project-based learning program focused on software engineering, problem-solving, and peer-to-peer learning

Projects

Lingo

Mobile app, and it's an AI-powered translator designed to provide clear and accurate translations while avoiding literal, word-for-word results. It preserves the meaning of your text and delivers smooth, natural-sounding language.

<https://eledrissi.dev/projects>

Mealpad

An android app for 1337 students to manage daily meals. Users can explore upcoming meals and interact with them.

<https://eledrissi.dev/projects>

Volern

An android app to help Arabic speakers expand their English vocabulary with words, meanings, examples, and pronunciation audio.

<https://play.google.com/store/apps/details?id=com.ElEdrissiApps.volern>

13Bus

A mobile app for 1337 students to manage transport. Users can view available buses, see schedules, and find the shortest route based on their destination.

Skills

Flutter

Dart

JP Compose
